

Ron Young is the founder of Knowledge Associates International, a small group of companies, who are based at St John's Innovation Centre, Cambridge U.K. He is acknowledged as a leading international expert and thought leader in strategic knowledge and AI management. He advised and assisted the UK DTI Innovation Unit in the production of the UK Government White Paper 'UK Competitiveness in the Knowledge Driven Economy'.

He chaired the BSI Knowledge Management Standards Committee, and he is a member of the ISO International Standards workgroups for Knowledge Management, Innovation Management, Asset Management and Artificial Intelligence. He lectures on the Global Knowledge and AI Driven Economy, and he teaches at leading Universities. He consults to the United Nations, World Bank, European Commission, MBRF Knowledge Foundation, and the inter-governmental Asian Productivity Organization.

He specializes in developing knowledge strategies, policies, governance models, standards, knowledge systems and knowledge driven platforms. He was a lead research consultant for the European Commission 'Know-Net' and LEVER projects.

He is author/editor of the books:
